

Flask App User Manual

Installations

1. You must have Python installed onto your computer
2. You must have “flask”, “flask_sqlalchemy”, and “flask_marshmallow” pip installed

Instructions

1. Open a command prompt
2. Change the directory to the “Flask App” folder
3. Run Python
4. Import “Room” from chatroom.py
5. Import Tkinter
6. Create a Tkinter window by typing “root = Tk()”
7. Create a Room instance by typing something similar to “window = Room(root, "input name here")”
8. Repeat step 7 as many times as you like to create multiple chatroom instances
9. Enjoy!
